

Smart Cities - interoperability and national level

**Central Office for the Development of
the Digital Society**

Bernard Gršić
State Secretary

Focus on interoperability

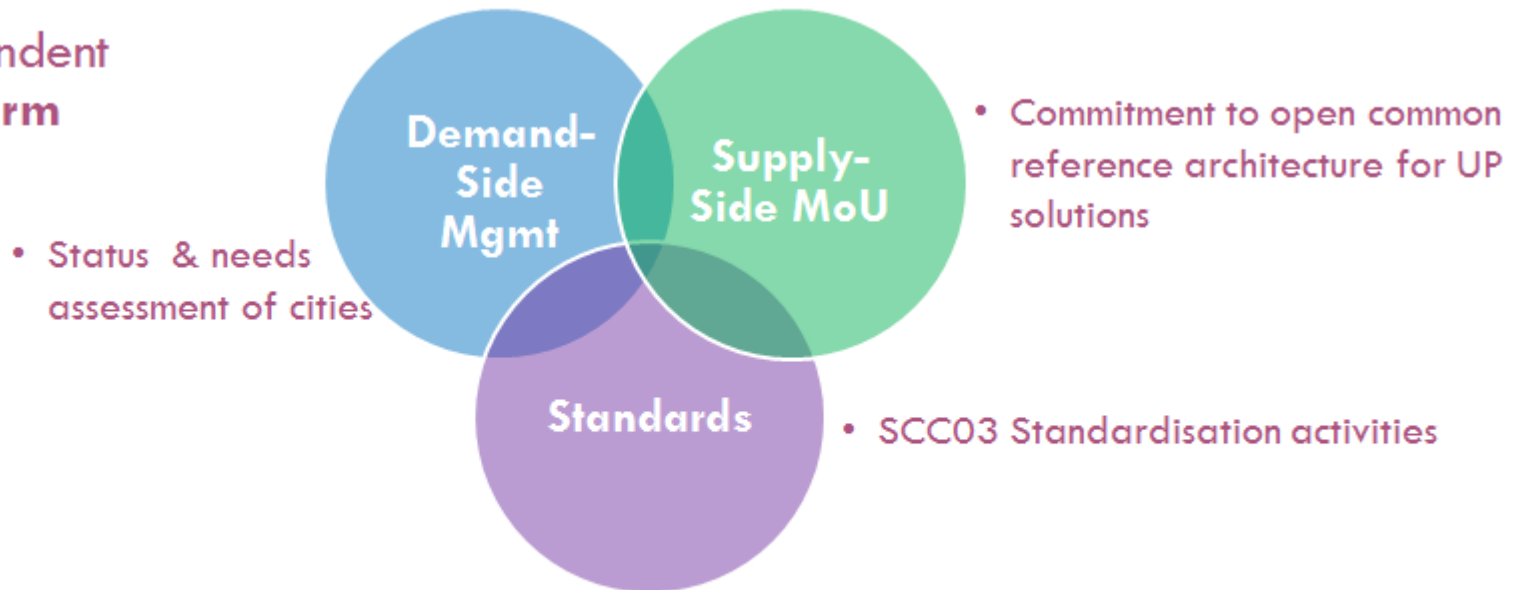

- Sector needs to be less fragmented
- Heterogeneous technology environment
- Interoperability challenges

European level

- European Innovation Partnership:

3 Inter-dependent Urban Platform Initiatives

European level

- Cities – characterized by their diversity
- Needed collaboration within the cities
- Interfaces should be standardized
- Association for Internet of Things Innovation (AIOTI) – www.aioti.eu

National level

1. Municipalities need capabilities
2. Investment certainty and government commitment
3. Research
4. Protecting privacy and security
5. Data sharing

National level

- Releasing more public open data
- Open Government Partnership – Action Plan
- Strategic document on open data
- Releasing priority datasets
